

Requirements for On Site Training

Employers will need to have:

- A forklift or order picker that is compliant and in safe working order, which has a capacity of at least 1000kg. The forklift may be electric, petrol, diesel or LP gas powered
- The manufacturer's operation manual.
- The forklift/order picker logbook.
- An area that is clear of pedestrian walk ways and high traffic flow areas.
- A working zone of no less than 400m².
- Shelving and/or racking which will allow the candidate to demonstrate the following lifts:
 - Low level lift (ground level)
 - Medium level lift (not less than 25% of the mast extension)
 - High level lift (not less than 75% of the mast extension)
- Obstacles that will allow the candidate to manoeuvre through a chicane.
- Three different loads, suitable for the forklift, at least 50% of the forklift capacity.

Applicants:

The applicants must have appropriate personal protective equipment, being:

- A safety helmet (if site required)
- Harness
- Enclosed footwear (no thongs or sandals)
- High visibility vest or other similar clothing
- Other protective clothing or equipment as required for the workplace

If the above conditions cannot be met, your employee may be trained and tested at our training centre in Carrum Downs.
